Definition update	Bridge		
-	-		A structure erected over a depression or an obstacle such as a body of water, railroad, etc., to provide a roadway for vehicles or pedestrians.
Definition update	Category Of Aggregation		
-	-		Named aggregations between two or more aids to navigation and/or navigationally relevant features.
Definition update	Category Of Association		
-	-		Named associations between two or more aids to navigation and/or navigationally relevant features.
Definition update	Category Of Power Source		
-	-		The classification of energy sources used to power an Aid to Navigation (AtoN).
Definition update	Category Of Synthetic AIS Aid To Navigation		
-	-		A classification of AIS AtoNs that are transmitted electronically and linked to a real-world object but do not physically exist at the broadcast location.
Definition update	Change Types		

-	-	Different categories or kinds of modifications that can be made to data, positions, or objects. For example, changes may involve updates to position, orientation, or attributes of an object.
Definition update	Daymark	
-	-	The identifying characteristics of an aid to navigation which serve to facilitate its recognition against a daylight viewing background. On those structures that do not by themselves present an adequate viewing area to be seen at the required distance, the aid is made more visible by affixing a daymark to the structure. A daymark so affixed has a distinctive colour and shape depending on the purpose of the aid.
Definition update	Emergency Wreck Marking Buoy	
-	-	An emergency wreck marking buoy is a buoy moored on or above a new wreck, designed to provide a prominent (both visual and radio) and easily identifiable temporary first response.
Definition update	Installation Buoy	
-	-	An installation buoy is a buoy used for loading tankers with gas or oil.
Definition update	Isolated Danger Beacon	
-	-	An isolated danger beacon is a beacon erected on an isolated danger of limited extent, which has navigable water all around it.
Definition update	Isolated Danger Buoy	
-	-	An isolated danger buoy is a buoy moored on or above an isolated danger of limited extent, which has navigable water all around it.
Definition update	Lateral Beacon	
-	-	A lateral beacon is used to indicate the port or starboard hand side of the route to be followed. They are generally used for well defined channels and are used in conjunction with a conventional direction of buoyage.
Definition update	Lateral Buoy	
-	-	A lateral buoy is used to indicate the port or starboard hand side of the route to be followed. They are generally used for well-defined channels and are used in conjunction with a conventional direction of buoyage.
Definition update	Mooring Buoy	
-	-	A buoy secured to the bottom by permanent moorings with means for mooring a vessel by use of its anchor chain or mooring lines.
Definition update	Range System	
-	-	Navigation system limited in their positioning capability to coastal regions, or those systems limited to making landfall
Definition	Safe Water Beacon	

update	-	-	A safe water beacon is used to indicate that there is navigable water around the mark.
Definition update	-	-	A safe water buoy is used to indicate that there is navigable water around the mark.
Definition update	-	-	Indicates whether specific actions or maintenance must be performed based on the season (for example, repositioning, removal, or other adjustments).
Definition update	-	-	A special purpose beacon is primarily used to indicate an area or feature, the nature of which is apparent from reference to a chart, Sailing Directions or Notices to Mariners.
Definition update	-	-	A special purpose buoy is primarily used to indicate an area or feature, the nature of which is apparent from reference to a chart, Sailing Directions or Notices to Mariners.
Definition update	-	-	A feature association for the binding between a navigation aid equipment feature and the structure that supports it.
Definition update	-	-	An Automatic Identification System (AIS) message 21 transmitted from an AIS station located remotely from the intended physical Aid to Navigation.
Definition update	-	-	A characteristic shape secured at the top of a buoy or beacon to aid in its identification.
Definition update	-	-	The process of deploying and activating a new Aid to Navigation (AtoN), ensuring that it is properly installed and operational.
Definition update	-	-	The process of decommissioning and physically removing an AtoN from its designated location, either temporarily or permanently.
Definition update	-	-	The act of swapping an existing AtoN with a new or upgraded unit, either due to maintenance needs or technological improvements.
Definition update	-	-	Any modification to an AtoN that uses sound signals, such as foghorns or bells, to assist in navigation under low visibility conditions.

Definition update	BridleLink Type	
-	-	The type of bridle link, which could refer to a structural or mechanical connection (like in a cable, chain, or rigging system).
Definition update	Cable Length	
-	-	A unit of distance originally equal to the length of a ship's anchor cable, but now generally considered to be about 600 feet. In the British Navy it is 608 feet, or exactly one-tenth of a nautical mile. In the United States Navy it is 720 feet but is infrequently used.
Definition update	Candela	
-	-	The unit of luminous intensity in the SI system.
Definition update	Counter Weight Type	
-	-	The type of counterweight used to balance or stabilize a structure, commonly found in lifting systems, buoys, or aids to navigation.
Definition update	Danger	
-	-	A signal or message warning of the presence of a danger to navigation.
Definition update	Diameter	
-	-	The measurement of the width of a circular or cylindrical Aids to Navigation component, typically referring to buoys, beacons, or light structures.
Definition update	Effective Intensity	
-	-	The luminous intensity of a fictitious juxtaposed steady-burning point light source that would appear to exhibit a luminosity equal to that of the rhythmic point light source it describes. The apparent reduction in intensity of the rhythmic light is subjective and is due to the nature of the response of the eye of the observer.
Definition update	Electronic Aton Change	
-	-	Modifications to electronic or digital AtoNs, such as AIS (Automatic Identification System) AtoNs, virtual AtoNs, or remote-controlled systems.
Definition update	Fixed Aton Change	
-	-	Modifications or updates to fixed AtoNs, such as lighthouses or beacons, which are permanently positioned.
Definition update	Floating Aton Change	
-	-	Adjustments or replacements related to floating AtoNs, such as buoys, which are anchored but can move with water currents.
Definition update	Height Length Units	
-	-	Units of measure of waterway distances.
Definition update	Horizontal Accuracy	

-	-	The degree to which a horizontal measurement is accurate, typically referring to the accuracy of an object's position in the horizontal plane (latitude and longitude).
Definition update	Lighted Aton Change	
-	-	Updates or modifications to light-emitting AtoNs, including changing light characteristics, intensity, or operational status.
Definition update	Maximum Display Scale	
-	-	The largest intended viewing scale for the data.
Definition update	Orientation	
-	-	The angular distance measured from true north to the major axis of the feature.
Definition update	Peak Intensity	
-	-	The maximum luminous intensity of a light during its flash cycle.
Definition update	Positioning Device	
-	-	A tool or instrument used to determine the geographic location of an object or point, such as a GPS receiver, radar, or other location-determining technologies.
Definition update	Positioning Equipment	
-	-	Devices and systems used to determine and maintain the correct position of an AtoN, including GPS, GNSS, and mooring systems.
Definition update	Positioning Procedure	
-	-	The method or process used to determine the location of an object or point in space. This may involve the use of technologies like GPS or triangulation methods.
Definition update	Reference Point	
-	-	Any point which can serve as a reference or base for the measurement of other quantities. Also called datum point.
Definition update	Sector Extension	
-	-	Distance in screen millimetres (mm) by which a sector is extended from its origin.
Definition update	Sinker Type	
-	-	Refers to the type of sinker or weight used to anchor an object (such as a buoy) to the seafloor or a fixed position.
Definition update	Swivel Type	
-	-	This refers to the type of swivel mechanism that allows rotation between two connected parts and is often used to reduce twisting in cables or ropes.
Definition update	Vertical Accuracy	
-	-	The degree to which a vertical measurement is accurate, typically referring to the accuracy of an object's position in the

vertical plane (height or depth)

Definition update	Weight	
-	-	(1) The force with which a body is attracted by gravity. (2) Any block or mass of material used for its heaviness. (3) The relative value of an observation, source, or quantity when compared with other observations, sources, or quantities of the same or related quantities. The value determined by the most reliable method is assigned the greatest weight.

Replacements	Change Beacon topmark damaged to Beacon Topmark Damaged	

1 x	<S100FC:label>Beacon topmark damaged</S100FC:label>	<S100FC:label>Beacon Topmark Damaged</S100FC:label>
Replacements	Change Beacon daymark unreliable to Beacon Daymark Unreliable	
1 x	<S100FC:label>Beacon daymark unreliable</S100FC:label>	<S100FC:label>Beacon Daymark Unreliable</S100FC:label>
Replacements	Change Beacon restored to normal to Beacon Restored To Normal	
1 x	<S100FC:label>Beacon restored to normal</S100FC:label>	<S100FC:label>Beacon Restored To Normal</S100FC:label>
Replacements	Change Buoy adrift to Buoy Adrift	
1 x	<S100FC:label>Buoy adrift</S100FC:label>	<S100FC:label>Buoy Adrift</S100FC:label>
Replacements	Change Buoy damaged to Buoy Damaged	
1 x	<S100FC:label>Buoy damaged</S100FC:label>	<S100FC:label>Buoy Damaged</S100FC:label>
Replacements	Change Buoy daymark unreliable to Buoy Daymark Unreliable	
1 x	<S100FC:label>Buoy daymark unreliable</S100FC:label>	<S100FC:label>Buoy Daymark Unreliable</S100FC:label>
Replacements	Change Buoy destroyed to Buoy Destroyed	
1 x	<S100FC:label>Buoy destroyed</S100FC:label>	<S100FC:label>Buoy Destroyed</S100FC:label>
Replacements	Change Buoy missing to Buoy Missing	
1 x	<S100FC:label>Buoy missing</S100FC:label>	<S100FC:label>Buoy Missing</S100FC:label>
Replacements	Change Buoy move to Buoy Move	
1 x	<S100FC:label>Buoy move</S100FC:label>	<S100FC:label>Buoy Move</S100FC:label>
Replacements	Change Buoy off position to Buoy off Position	
1 x	<S100FC:label>Buoy off position</S100FC:label>	<S100FC:label>Buoy off Position</S100FC:label>
Replacements	Change Buoy restored to normal to Buoy Restored to Normal	
1 x	<S100FC:label>Buoy restored to normal</S100FC:label>	<S100FC:label>Buoy Restored to Normal</S100FC:label>
Replacements	Change Buoy topmark damaged to Buoy Topmark Damaged	
1 x	<S100FC:label>Buoy topmark damaged</S100FC:label>	<S100FC:label>Buoy Topmark Damaged</S100FC:label>
Replacements	Change Buoy topmark missing to Buoy Topmark Missing	
1 x	<S100FC:label>Buoy topmark missing</S100FC:label>	<S100FC:label>Buoy Topmark Missing</S100FC:label>
Replacements	Change Buoy will be withdrawn to Buoy Will Be Withdrawn	
1 x	<S100FC:label>Buoy will be withdrawn</S100FC:label>	<S100FC:label>Buoy Will Be Withdrawn</S100FC:label>
Replacements	Change Buoy withdrawn to Buoy Withdrawn	
1 x	<S100FC:label>Buoy withdrawn</S100FC:label>	<S100FC:label>Buoy Withdrawn</S100FC:label>
Replacements	Change Marine Aids to Navigation unreliable to Marine Aids to Navigation Unreliable	
1 x	<S100FC:label>Marine Aids to Navigation unreliable</S100FC:label>	<S100FC:label>Marine Aids to Navigation Unreliable</S100FC:label>
Replacements	Change Seasonal decommissioning complete to Seasonal Decommissioning Complete	
1 x	<S100FC:label>Seasonal decommissioning complete</S100FC:label>	<S100FC:label>Seasonal Decommissioning Complete</S100FC:label>
Replacements	Change Seasonal decommissioning in progress to Seasonal Decommissioning in Progress	

	1 x	<S100FC:label>Seasonal decommissioning in progress</S100FC:label>	<S100FC:label>Seasonal Decommissioning in Progress</S100FC:label>
Replacements		Change Group-occulting light to Group-Occulting Light	
	1 x	<S100FC:label>Group-occulting light</S100FC:label>	<S100FC:label>Group-Occulting Light</S100FC:label>
Replacements		Change Composite group-occulting light to Composite Group-Occulting Light	
	1 x	<S100FC:label>Composite group-occulting light</S100FC:label>	<S100FC:label>Composite Group-Occulting Light</S100FC:label>
Replacements		Change Composite group-flashing light to Composite Group-Flashing Light	
	1 x	<S100FC:label>Composite group-flashing light</S100FC:label>	<S100FC:label>Composite Group-Flashing Light</S100FC:label>
Replacements		Change Group quick light to Group Quick Light	
	1 x	<S100FC:label>Group quick light</S100FC:label>	<S100FC:label>Group Quick Light</S100FC:label>
Replacements		Change Group very quick light to Group Very Quick Light	
	1 x	<S100FC:label>Group very quick light</S100FC:label>	<S100FC:label>Group Very Quick Light</S100FC:label>
Replacements		Change Light unlit to Light Unlit	
	1 x	<S100FC:label>Light unlit</S100FC:label>	<S100FC:label>Light Unlit</S100FC:label>
Replacements		Change Light unreliable to Light Unreliable	
	1 x	<S100FC:label>Light unreliable</S100FC:label>	<S100FC:label>Light Unreliable</S100FC:label>
Replacements		Change Light re-establishment to Light Re-Establishment	
	1 x	<S100FC:label>Light re-establishment</S100FC:label>	<S100FC:label>Light Re-Establishment</S100FC:label>
Replacements		Change Light range reduced to Light Range Reduced	
	1 x	<S100FC:label>Light range reduced</S100FC:label>	<S100FC:label>Light Range Reduced</S100FC:label>
Replacements		Change Light without rhythm to Light Without Rhythm	
	1 x	<S100FC:label>Light without rhythm</S100FC:label>	<S100FC:label>Light Without Rhythm</S100FC:label>
Replacements		Change Light out of synchronization to Light Out Of Synchronization	
	1 x	<S100FC:label>Light out of synchronization</S100FC:label>	<S100FC:label>Light Out Of Synchronization</S100FC:label>
Replacements		Change Light daymark unreliable to Light Daymark Unreliable	
	1 x	<S100FC:label>Light daymark unreliable</S100FC:label>	<S100FC:label>Light Daymark Unreliable</S100FC:label>
Replacements		Change Light operating properly to Light Operating Properly	
	1 x	<S100FC:label>Light operating properly</S100FC:label>	<S100FC:label>Light Operating Properly</S100FC:label>
Definition update		leading line	
	-	-	A line passing through two or more clearly defined charted objects, and along which a vessel can approach safely.
Definition update		measured distance	
	-	-	A course at sea, whose ends are indicated by ranges ashore, and whose length has been accurately measured for determining the speed of vessels.
Definition update		range system	

-	-	Navigation system limited in their positioning capability to coastal regions, or those systems limited to making landfall
Definition update	channel markings	
-	-	A group of channel marks which indicate channel limits.
Definition update	danger markings	
-	-	One or more aids to navigation and the danger(s) that are marked.
Definition update	battery	
-	-	A fortified structure on which artillery is mounted.
Definition update	Discrepancy	
-	-	(1) A difference between results of duplicate or comparable measures of a quantity. (2) The difference in computed values of a quantity obtained by different processes using data from the same survey.
Definition update	Buoy establishment	
-	-	A new buoy has been or will be established.
Definition update	Light establishment	
-	-	A new light has been or will be established.
Definition update	Beacon establishment	
-	-	A new beacon has been or will be established.
Definition update	Audible signal establishment	
-	-	A new audible signal (device activated by e.g. sea state or wind, irrespective of visibility) has been or will be established.
Definition update	Fog signal establishment	
-	-	A new fog signal has been or will be established.
Definition update	AIS transmitter establishment	
-	-	A new AIS site has been or will be established.
Definition update	V-AIS establishment	
-	-	A new V-AIS has been or will be established.
Definition update	RACON establishment	
-	-	A new RACON has been or will be established.
Definition update	DGPS station establishment	
-	-	A new DGPS station has been or will be established.
Definition update	eLORAN station establishment	
-	-	A new eLORAN station has been or will be established.
Definition update	DGLONASS station establishment	
-	-	A new DGLONASS station has been or will be established.

Definition update	e-Chayka station establishment	
-	-	A new e-Chayka station has been or will be established.
Definition update	Buoy removal	
-	-	Buoy has been or will be permanently removed from service.
Definition update	Buoy temporary removal	
-	-	Buoy has been or will be temporarily removed from service.
Definition update	Light removal	
-	-	Light has been or will be permanently removed from service.
Definition update	Light temporary removal	
-	-	Light has been or will be temporarily removed from service.
Definition update	Beacon removal	
-	-	Beacon has been or will be permanently removed from service.
Definition update	Beacon temporary removal	
-	-	Beacon has been or will be temporarily removed from service.
Definition update	Fog signal removal	
-	-	Fog signal has been or will be permanently removed from service.
Definition update	Fog signal temporary removal	
-	-	Fog signal has been or will be temporarily removed from service.
Definition update	Audible signal removal	
-	-	Audible signal (device activated by e.g. sea state or wind, irrespective of visibility) has been or will be permanently removed from service.
Definition update	Audible signal temporary removal	
-	-	Audible signal (device activated by e.g. sea state or wind, irrespective of visibility) has been or will be temporarily removed from service.
Definition update	V-AIS removal	
-	-	V-AIS has been or will be permanently removed from service.
Definition update	V-AIS temporary removal	
-	-	V-AIS has been or will be temporarily removed from service.
Definition update	RACON temporary removal	
-	-	RACON has been or will be temporarily removed from service.
Definition update	LORAN C station removal	

-	-	LORAN C station has been or will be permanently removed from service.
Definition update	LORAN C station temporary removal	
-	-	LORAN C station has been or will be temporarily removed from service.
Definition update	Chayka station removal	
-	-	Chayka station has been or will be permanently removed from service.
Definition update	Chayka station temporary removal	
-	-	Chayka station has been or will be temporarily removed from service.
Definition update	e-Chayka station removal	
-	-	The e-Chayka station has been or will be permanently removed from service.
Definition update	e-Chayka station temporary removal	
-	-	The e-Chayka station has been or will be temporarily removed from service
Definition update	Buoy change	
-	-	The characteristics of the buoy have been or will be changed.
Definition update	Buoy temporary change	
-	-	The characteristics of the buoy have been or will be temporarily changed.
Definition update	Light change	
-	-	The characteristics of the light have been or will be changed.
Definition update	Light temporary change	
-	-	The characteristics of the light have been or will be temporarily changed.
Definition update	Sector light change	
-	-	The characteristics of the sector light have been or will be changed.
Definition update	Sector light temporary change	
-	-	The characteristics of the sector light have been or will be temporarily changed.
Definition update	Beacon change	
-	-	The characteristics of the beacon have been or will be changed.
Definition update	Beacon temporary change	
-	-	The characteristics of the beacon have been or will be temporarily changed.
Definition update	Fog signal change	

-	-	The characteristics of the fog signal have been or will be changed.
Definition update	Fog signal temporary change	
-	-	The characteristics of the fog signal have been or will be temporarily changed.
Definition update	Audible signal change	
-	-	The characteristics of the audible signal (device activated by e.g. sea state or wind, irrespective of visibility) have been or will be changed.
Definition update	Audible signal temporary change	
-	-	The characteristics of the audible signal (device activated by e.g. sea state or wind, irrespective of visibility) have been or will be temporarily changed.
Definition update	V-AIS change	
-	-	The characteristics of the V-AIS have been or will be changed.
Definition update	V-AIS temporary change	
-	-	The characteristics of the V-AIS have been or will be temporarily changed.
Definition update	RACON temporary change	
-	-	The characteristics of the RACON have been or will be temporarily changed.
Definition update	Audible signal out of service	
-	-	The audible signal (device activated by e.g. sea state or wind, irrespective of visibility) is inoperative.
Definition update	Fog signal out of service	
-	-	The fog signal is inoperative.
Definition update	Audible signal operating properly	
-	-	The audible signal (device activated by e.g. sea state or wind, irrespective of visibility) is operating as advertised.
Definition update	Fog signal operating properly	
-	-	The fog signal is operating as advertised.
Definition update	Catenary Anchor Leg Mooring	
-	-	Incorporates a large buoy which remains on the surface at all times and is moored by 4 or more anchors. Mooring hawsers and cargo hoses lead from a turntable on top of the buoy, so that the buoy does not turn as the ship swings to wind and stream.
Definition update	Single Buoy Mooring	
-	-	A large mooring buoy used by tankers to load and unload in port approaches or in offshore oil and gas fields.
Definition update	Bridge	

-	-	A structure erected over a depression or an obstacle such as a body of water, railroad, etc., to provide a roadway for vehicles or pedestrians.
Definition update	Likely to Change and Significant Shoaling Expected	
-	-	Continuous or frequent change (for example river siltation, sand waves, seasonal storms, ice bergs, etc) that is likely to result in new significant shoaling.
Definition update	Likely to Change But Significant Shoaling Not Expected	
-	-	Continuous or frequent change (for example sand wave shift, seasonal storms, ice bergs, etc) that is not likely to result in new significant shoaling.
Definition update	AIS transmitter out of service	
-	-	The terrestrial AIS transmitter is inoperative due to a technical issue.
Definition update	AIS transmitter unreliable	
-	-	The terrestrial AIS transmitter is unreliable due to a technical issue or maintenance.
Definition update	AIS transmitter operating properly	
-	-	The terrestrial AIS transmitter is operating as advertised.
Definition update	V-AIS out of service	
-	-	Virtual AIS aid to navigation is extinguished.
Definition update	V-AIS unreliable	
-	-	Virtual AIS aid is unreliable due to a technical issue or maintenance.
Definition update	V-AIS operating properly	
-	-	Virtual AIS aid to navigation is operating as advertised.
Definition update	RACON out of service	
-	-	The RACON is inoperative.
Definition update	RACON unreliable	
-	-	The RACON is unreliable due to a technical issue or maintenance.
Definition update	RACON operating properly	
-	-	The RACON is operating as advertised.
Definition update	DGPS out of service	
-	-	The DGPS station is inoperative due to a technical issue.
Definition update	DGPS operating properly	
-	-	The DGPS station is operating as advertised.
Definition update	DGPS unreliable	
-	-	The DGPS station is unreliable due to a technical issue or

Definition update	eLORAN operating properly		maintenance.
-	-		
Definition update	eLORAN unreliable		The eLORAN station is operating as advertised.
-	-		
Definition update	eLORAN out of service		The eLORAN station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	eLORAN out of service		The eLORAN station is inoperative due to a technical issue.
-	-		
Definition update	Chayka operating properly		The eLORAN station is inoperative due to a technical issue.
-	-		
Definition update	Chayka unreliable		The Chayka station is operating as advertised.
-	-		
Definition update	Chayka unreliable		The Chayka station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	Chayka out of service		The Chayka station is inoperative due to a technical issue.
-	-		
Definition update	Chayka out of service		The Chayka station is inoperative due to a technical issue.
-	-		
Definition update	e-Chayka operating properly		The Chayka station is inoperative due to a technical issue.
-	-		
Definition update	e-Chayka operating properly		The e-Chayka station is operating as advertised.
-	-		
Definition update	e-Chayka unreliable		The e-Chayka station is operating as advertised.
-	-		
Definition update	e-Chayka unreliable		The e-Chayka station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	e-Chayka out of service		The e-Chayka station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	e-Chayka out of service		The e-Chayka station is inoperative due to a technical issue.
-	-		
Definition update	EGNOS operating properly		The e-Chayka station is inoperative due to a technical issue.
-	-		
Definition update	EGNOS operating properly		The EGNOS station is operating as advertised.
-	-		
Definition update	EGNOS unreliable		The EGNOS station is operating as advertised.
-	-		
Definition update	EGNOS unreliable		The EGNOS station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	EGNOS out of service		The EGNOS station is unreliable due to a technical issue or maintenance.
-	-		
Definition update	EGNOS out of service		The EGNOS station is inoperative due to a technical issue.
-	-		
Definition update	Beacon missing		The EGNOS station is inoperative due to a technical issue.
-	-		
Definition update	Beacon missing		No beacon at the advertised position.
-	-		
Definition update	Beacon damaged		No beacon at the advertised position.
-	-		
Definition update	Beacon damaged		The beacon has sustained damage due to external factors (wind, sea state, collision with a vessel).
-	-		
Definition update	Beacon topmark missing		The beacon has sustained damage due to external factors (wind, sea state, collision with a vessel).
-	-		
Definition update	Beacon topmark missing		The topmark of the beacon is missing.
-	-		
Definition update	Beacon topmark damaged		The topmark of the beacon is missing.
-	-		

-	-	The topmark of the beacon is damaged due to external factors (wind, sea state, collision with a vessel).
Definition update	Beacon daymark unreliable	
-	-	Colour of the beacon daymark is not visible due to damage or fading of colours (out of tolerance with colour recommendations).
Definition update	Beacon restored to normal	
-	-	The beacon has been restored to normal condition.
Definition update	Buoy adrift	
-	-	The buoy is no longer secured to its moorings and is adrift.
Definition update	Buoy damaged	
-	-	The buoy has been damaged due to external factors (wind, sea state, collision with a vessel).
Definition update	Buoy daymark unreliable	
-	-	Colour of the buoy daymark is not visible due to damage or fading of colours (out of tolerance with colour recommendations).
Definition update	Buoy destroyed	
-	-	The buoy has suffered extensive damage and is not useable.
Definition update	Buoy missing	
-	-	No buoy at its advertised/charted position or in the vicinity.
Definition update	Buoy move	
-	-	The buoy has been or will be moved intentionally.
Definition update	Buoy off position	
-	-	The buoy has been dragged off its advertised position due to wind or current affecting the mooring system.
Definition update	Buoy restored to normal	
-	-	The buoy has been restored to normal condition.
Definition update	Buoy topmark damaged	
-	-	The topmark of the buoy is damaged due to external factors (wind, sea state, collision with a vessel).
Definition update	Buoy topmark missing	
-	-	The topmark of the buoy is missing.
Definition update	Buoy will be withdrawn	
-	-	The buoy has been scheduled for removal from service for a fixed term.
Definition update	Buoy withdrawn	
-	-	The buoy has been removed from service for a fixed term.

Definition update		Marine Aids to Navigation unreliable	
-	-		The position or status of Marine Aids to Navigation, over an extensive area, is unreliable due to a natural event (freshet, storm surge, flooding).
Definition update		Seasonal decommissioning complete	
-	-		The completion of the process to remove summer buoys (and possibly replace some with winter spar buoys).
Definition update		Seasonal decommissioning in progress	
-	-		The commencement of the process to remove summer buoys (and possibly replace some with winter spar buoys).
Definition update		Metres	
-	-		The basic unit of length in the International System of Units (SI) system.
Definition update		Feet	
-	-		A unit of length equal to 12 inches, 1/6 of a fathom, or 30.480 centimetres.
Definition update		Kilometres	
-	-		A unit of length, the common measure of distances equal to 1000 metres, and equivalent to 3280.8 feet or 0.621 mile.
Definition update		Hectometres	
-	-		Heights/lengths are specified in hectometres (100 metres).
Definition update		Statute Miles	
-	-		A unit equal to 5280 feet.
Definition update		Nautical Miles	
-	-		A unit of length equal to 1,852 metres. This value was approved by the International Hydrographic Conference of 1929 and has been adopted by nearly all maritime states.
Definition update		Mahe 1971	
-	-		A geodetic datum first defined in 1971 suitable for use in Seychelles - Mahe Island. Mahe 1971 references the Clarke 1880 (RGS) ellipsoid and the Greenwich prime meridian. Mahe 1971 origin is Fundamental point: Station SITE. Latitude: 440'14.644"S, longitude: 5528'44.488"E (of Greenwich). Mahe 1971 is a geodetic datum for US military survey. It was defined by information from Clifford Mugnier's September 2007 PE,RS "Grids and Datums" article on Seychelles (www.asprs.org/resources/grids/). South East Island 1943 (datum code 1138) used for topographic mapping, cadastral and hydrographic survey.
Definition update		Qornoq	
-	-		A geodetic datum first defined in 1927 suitable for use in Greenland - west coast onshore. Qornoq 1927 references the International 1924 ellipsoid and the Greenwich prime meridian. Qornoq 1927 origin is Fundamental point: Station

7008. Latitude: 6431'06.27"N, longitude: 5112'24.86"W (of Greenwich). Qornoq 1927 is a geodetic datum for Topographic mapping. It was defined by information from Kort, Matrikelstyrelsen, Copenhagen. Origin coordinates from NIMA <http://earth-info.nima.mil/>.

Definition update	Fixed and Alternating Flashing	
-	-	A rhythmic light in which a fixed light is combined with a flashing light of higher luminous intensity and different colour.
Definition update	Composite group-flashing light	
-	-	A flashing light in which a sequence of groups of one or more flashes, which are specified in number, is regularly repeated, and the groups comprise different numbers of flashes.
Definition update	Group quick light	
-	-	A light in which flashes are combined in groups including the same number of quick flashes (repetition rate : 50-79 per minute) and in which groups are repeated at regular intervals.
Definition update	Group very quick light	
-	-	A light in which very quick flashes are combined in groups including the same number of flashes (repetition rate : 80-159 per minute) and in which groups are repeated at regular intervals.
Definition update	Light unlit	
-	-	The light is extinguished.
Definition update	Light unreliable	
-	-	The light is unreliable due to technical problems.
Definition update	Light re-establishment	
-	-	The re-establishment of a light which was previously announced as either destroyed or temporarily removed.
Definition update	Light range reduced	
-	-	The nominal range of the light is less than the advertised range.
Definition update	Light without rhythm	
-	-	Due to technical problems the light has no more rhythm and is in fixed light mode.
Definition update	Light out of synchronization	
-	-	The light is no longer synchronized with another light or group of lights.
Definition update	Light daymark unreliable	
-	-	The light daymark is not visible due to damage or fading of colours (out of tolerance with colour recommendations).
Definition update	Light operating properly	
-	-	The light is operating as advertised

Definition update	Ice	
-	-	Frozen water.
Definition update	Inadequately Surveyed	
-	-	Position data is of a very poor quality.
